

Legacy DOS Boot Floppies

DOS never dies! So don't the boot floppies ;-)

I have these since years and made them ready for web-download in 2001 already.
Now I gathered them back from my archives to put them aside to download at [phunsites.net](#).

Maybe, these are of use to others to.

Here's a short overview of the bootdisks available:

[MS-DOS 6.22*](#)]

[MS-DOS 7.0 Beta \(never released\)**\]](#)

[IBM PC-DOS 7.01*](#)]

[DR-DOS 7.03**\]](#)

[Windows 95 4.00.950*](#)]

[Windows 95 4.00.1212*](#)]

[Windows 98 4.10.1998*](#)]

[Windows 95 SE 4.10.2222\]](#)

[Windows ME 4.90\]](#)

Additionally, there's the following tools available:

[DOS/Windows Version of 'dd'\]](#)

[DOS/Windows CLI to overwrite floppy boot code; will allow to boot from HD even if the floppy is inserted\]](#)

[DOS CD-ROM drivers for various drives\]](#)

Maybe these can still be of value, despite floppy drives being gone and virtualization on the edge.

Disclaimer: I take no liability whatsoever damage could arise out of the use of these disk images.

These boot disks are provided "as is". The copyright of the software contained on the boot disks retains to their respective copyright holder.
